

## **The Go-Ped Pro-Ped Stand-Up Gas Scooter Is Legal For Sale In California**

*UrbanScooters.com announces the all new Go-Ped Pro-Ped propane powered gas scooter. It's all new and the only gas scooter clean and green enough to be legal for sale in California.*

**Nov. 27, 2009** - [PRLog](#) -- UrbanScooters.com is pleased to announce the Go-Ped GSR Pro-Ped Propane Powered Scooter to its extensive offering of gas scooters. The Pro-Ped is the only clean, green, eco-friendly stand-up gas scooter able to pass California's strict C.A.R.B. emissions standards. When you get electricity from coal powered plants, the Pro-Ped is arguably as environmentally sound as comparable electric scooters. That said, it's less than half the weight and cost. This state of the art, innovative, propane scooter is made for fun-seekers and commuters who want to save the environment while bypassing the price at the pump.

The Go-Ped Pro-Ped is reliable, very solid, super quiet, ultra efficient and simple to maintain. The ride is smooth, steady and stable. The quality built, heavy duty steel frame can carry up to 400 lbs. The GoPed Pro-Ped's LEHR engine won Popular Mechanics 2009 "10 Most Brilliant Products" breakthrough award. It generates 96% fewer carcinogens and 97% fewer particulates than regular 4 stroke gas scooter engines. Propane canisters are extremely simple to install and found at local camping and hardware shops. Installation is as simple as "Twist and Go!"

US based Go-Ped, aka Patmont Motor Werks, started the motorized scooter craze 20 years ago and continues to deliver the best quality, most innovative scooting machines in the world. Go-Ped has raised the bar once again with the release of the Pro-Ped gas scooter!
