

Affordable, Time-Tested Investment Service Offers Unprecedented Insight and Consistent Returns

Knox Hill Partners provides stock recommendations and tools needed to generate solid returns over short-term investment periods.

Dec. 3, 2009 - [PRLog](#) -- Charlotte, N.C. - Knox Hill Partners, Inc. announced today the offering of its proprietary stock market analytic service through www.knoxhillstocks.com, a new web-based service designed to help investors navigate today's volatile financial markets.

Based on a proven trading model developed and used by one of the company's founding partners, www.knoxhillstocks.com provides a suite of products that gives anyone the ability to grow their wealth while minimizing risks.

The new subscription-based service was designed to allow anyone, regardless of trading experience or market knowledge, to build and manage personal investments using a highly affordable, time-tested model. Knox Hill is offering investors the opportunity to try the service for 30 days at no cost and with no obligation. After the 30-day trial period, subscribers may utilize the service for only \$24.95 per month with no annual commitment.

All clients benefit from three powerful products:

- a.V.a™ Penny Stocks assists investors in identifying and maximizing buying opportunities in the penny stock markets. By applying Knox Hill's proprietary analytics, a.V.a highlights securities that meet specific thresholds for risk, performance and returns over a certain period of time. After identifying key stocks up to \$5.00 a share, a.V.a™ leverages Knox Hill's proven trading model to determine how investors can best build on investments – when to buy and sell, to minimize risk while realizing returns that outperform the market.
- Ask a.V.a™ enables subscribers to take advantage of Knox Hill's powerful analytics engine, by querying whether to buy, sell or hold an individual security, regardless of trading price. In addition to highlighting investment opportunities, Ask a.V.a™ provides detailed information about each queried stock, including the last closing price, a suggested limit price, and a recommended target price.
- a.V.a™ Indicator, an at-a-glance graphical tool, enables clients to quickly determine the overall health of the financial markets on a daily basis. The a.V.a™ Indicator reflects Knox Hill's thorough analysis of more than 7,500 securities, helping subscribers to quickly assess the status of overall market prices, which can then be factored into investment decisions.

About Knox Hill Partners

Knox Hill Partners was created with the sole intent of providing clients with unprecedented market insight, based on time-tested methods and proven analytics. Through a subscription-based website, www.knoxhillstocks.com, the company offers a risk-controlled, disciplined investing system that delivers healthy returns on a select set of stocks.
