

Free Webinar Series at Aqualipo.com Demonstrates New Combination Liposuction/Fat Transfer Treatment

The combination of AQUALIPO™ and NaturalFill™ ? revolutionary new liposuction and fat transfer treatments ? can help people slim down, reduce facial wrinkling, and plump lips all in one minimally invasive treatment.

Dec. 14, 2009 - [PRLog](#) -- The combination of AQUALIPO™ and NaturalFill™ can remove excess fat from the abdomen and inject it into the face and lips to help people slim down, reduce facial wrinkling and enhance lips all in one safe, minimally invasive combination treatment. Aqualipo.com, a new informative website about these groundbreaking advances in liposuction and natural fat transfer, is offering a series of free, live surgery webinars during December, January and February. Participants can register for the webinars at http://aqualipo.com/liposuction/aqualipo_live_surgery.aspx.

According to Dr. Roger Bassin, a leading Florida cosmetic surgeon who pioneered the AQUALIPO™ and NaturalFill™ procedures, “Many people have stubborn areas of fat that won’t disappear, no matter how much they diet and exercise. Now, with AQUALIPO™ and NaturalFill™ you can safely and easily remove fat from areas you want to slim down, and then inject it into your face to make yourself look years younger. Even more exciting, when compared to conventional liposuction and temporary cosmetic injectables, AQUALIPO™ and NaturalFill™ offer permanent results, with less patient discomfort and minimal downtime.”

AQUALIPO™ is a revolutionary new liposuction treatment combining powerful fat-melting lasers with gentle water-based fat removal to permanently eliminate fat from targeted areas of the body. Unlike conventional liposuction, the AQUALIPO™ process also promotes skin tightening for superior body contouring, while dramatically reducing patient bruising and swelling.

Once the AQUALIPO™ procedure is complete, the NaturalFill™ fat transfer process can begin immediately. Before NaturalFill™, recovering fat after liposuction required a lengthy centrifuge process to prepare the fat for transfer. But, because AQUALIPO™ is so gentle, fat cells are removed intact and ready for immediate transfer. By using the body’s own fat as a natural cosmetic injectable, NaturalFill™ Facial Filler can help smooth lines and wrinkles, eliminate bags under the eyes, plump up hollowed cheeks, smooth acne scarring, improve chin contour, and add volume to the lips.

Dr. Bassin says, “With AQUALIPO™ and NaturalFill™, there’s no need for general anesthesia, so there’s less medical risk and no patient downtime. And, unlike temporary cosmetic fillers and collagen injections, there’s no need for frequent follow-up treatments.”

During the free webinars, participants will be able to view the AQUALIPO™ and NaturalFill™ procedures performed live and have their questions answered during a live chat with Dr. Bassin. Registration for the webinars is free. The AQUALIPO™/NaturalFill™ Facial Filler webinars will be held live at 8:30pm EST (and replayed at 11:30pm EST the same evening) on the following dates: December 17, 2009, January 13, 2010, January 27, 2010, February 10, 2010 and February 24, 2010.

About the new AQUALIPO™ Website

Aqualipo.com is a new website containing detailed information about the latest advancements in liposuction and natural fat transfer, including AQUALIPO™ and NaturalFill™ Facial Filler. For more information about AQUALIPO™ and NaturalFill™ Facial Filler, visit aqualipo.com or call (212) 561-5885.

About Roger Bassin, M.D.

Dr. Roger Bassin, a leading cosmetic surgeon in Florida and the head of the Bassin Institute, is the pioneer of the innovative AQUALIPO™ and NaturalFill™ procedures. Dr. Bassin is board certified by the American Board of Ophthalmology and a member of both the American Academy of Cosmetic Surgery as well as the American Society of Liposuction Surgery. Extensively published in his fields of expertise, Dr. Bassin has been featured in many national and local media outlets for his innovations in liposuction techniques.
