

## **HauteSpot Networks Hires Southeast Security Products to Represent the South Eastern United States**

*HauteSpot Networks Corporation, a leading provider of wireless broadband solutions optimized for IP video and voice, announced today that it has entered into a sales representation agreement with Southeast Security Products for the South Eastern US.*

**Jan. 11, 2010 - [PRLog](#)** -- HauteSpot Networks Corporation of San Luis Obispo California, a leading provider of wireless broadband solutions optimized for IP video and voice, recently expanded its sales representation into the Florida, Georgia, Alabama, Mississippi, Tennessee, North and South Carolina, and Southern Virginia areas by entering into a representation agreement with Southeast Security Products of Pompano Beach, FL.

“We are very happy to have found a great sales partner like Southeast Security Products to represent our products,” said CEO Bob Ehlers of HauteSpot Networks. “We have many customers in the Southeast and are pleased that we can now provide localized coverage to meet their needs. Southeast Security Products line card already contains products which we have proven solutions with including GVI Samsung and Arecont Vision cameras, and Dedicated Micros NVRs, “ continued Ehlers. “By adding HauteSpot Networks wireless routers, Southeast Security Products now offers a complete solution set including wireless.”

### About Hautespot Networks

From 20 yards to 20 miles, from CCTV to HD Broadcast production, HauteSpot Networks wireless technology allows any camera or weather station to be located virtually anywhere.

HauteSpot Networks' high performance modular wireless routing platform can be easily configured to meet the most demanding needs of HD broadcast, surveillance, environmental monitoring, and OEM customers. HauteSpot Networks' proprietary TLPTM protocol supports wireless point to multipoint video streaming at rates up to 65Mbps with low latency, no jitter, and predictable delay variation. HauteSpot Networks offers solutions for a range of applications, cost targets, and configurations including support for point to multipoint, mesh, full duplex point to point, and standard 802.11.

Founded in 2006 in San Luis Obispo California, HauteSpot Networks Corporation is privately held.
