

Renewable Energy with a Tesla Generator

In order to save electricity, more number of people around the globe are opting for alternate electrical sources to save on power bills. Apart from solar energy, there is an emerging trend of an alternate electrical source called a tesla generator.

Jan. 26, 2010 - [PRLog](#) -- In order to save electricity, more number of people around the globe are opting for alternate electrical sources to save on power bills. There are various options for renewable energy which are getting easier to use. Apart from solar energy and wind energy, there is an emerging trend of an alternate electrical source called a tesla generator. Based upon attraction and repulsion of magnetic poles, a perpetual motion is attained, which is later converted into electricity. Additionally, the magnetic generator has the capability to produce more electricity then it actually consumes.

Build your own Tesla Generator here ----- <http://www.freepowergenerator.info>

This means that the creation of electrical energy doesn't need help from other energy source for operation. An individual will be able to produce free electricity after investing costs on materials used in setting up a magnetic generator. Anybody can build their own DIY tesla generator, but it is best advised to spend quality on researching about the blueprints and guides during the process. Ideally, the material cost would be around hundred dollars and building it would effectively reduce the power bill charges by about 20% to 50%.

Save Money and Electricity Today! ----- <http://www.freepowergenerator.info>

In addition, these magnetic generators are reliable and offer electricity without any need for routine checking. The magnet has the capability of generating electricity nearly for four hundred years after which they would lose their ability. These magnetic generators are eco-friendly and safe to use, as they don't produce any harmful by-products. Typically, the tesla generator would involve less cost and provide free electrical energy for a life-long period.
