They are source of continuous bother to the person who suffers from them and are a cause of low self esteem sometimes as well. On top of this, hemorrhoids get worse over time. What are the causes of hemorrhoids? There are several causes for this condition, some of which include weak rectal vein walls, excessive straining during the bowel movements and constipation, several episodes of diarrhea and a diet that is deprived of fiber and maybe water. Additional factors that may be linked to hemorrhoids are obesity, a sedentary lifestyle and vitamin deficiencies. The major factor is chronic constipation here, since the individuals tend to create or exert tremendous pressure on their rectum to evacuate their bowels. It is seen that people who have hemorrhoids generally have a low intake of fluids.

So aren't you tired of that itchy feeling accompanied with pain and bleeding? People often tend to restrict their diet and curb their work patterns in hope of some relief. They use creams, pills, suppositories and certain ointments but are unable to get rid of the situation entirely. Going to the doctors' increases your medical expenses as sometimes you need to get operated on – which is far from ideal.

If you go to a doctor, he might refer you to a surgery, hemorrhoid banding or laser treatments. But none of these catch the root cause of the problem. What this kind of treatment does is simply remove the symptoms of the problem, not the underlying causes. Application of ointments and creams are only temporary. But the H Miracle package is here to treat you completely and safely with the help of a Chinese Fargei remedy amongst others.
