Lynn Lunik, Microsoft MVP and "MSDN Contributor of the Year" releases MSFT Training Videos

Learn both Microsoft® Forefront Client Security SP1 AND Windows® 2008 SP2 Failover Cluster through 'Advanced Technology Lab Exercise Video Courses' led by Mr. Lynn Lunik.

May 10, 2010 - *PRLog* -- Join Mr. Lynn Lunik, Microsoft® MVP and winner of the "2009 MSDN Contributor of the Year" award to learn Microsoft® Windows Core Infrastructure technologies.

Microsoft® Forefront Client Security SP1 - Includes 18 Total Lessons running just under 15 Hours of Video Materials. The Forefront Client Security SP1 Server is configured initially using Installation, Configuration and Administration Steps for 1) Windows 2008 SP2, 2) Internet Information Service 7, 3) SQL 2005 Service Pack 2, 4) Windows Software Update Services 3.0 SP1, and 5) Forefront Client Security SP1. The Client Workstations for this Module include 1) Windows Vista Enterprise SP2, and 2) Windows XP SP3. This Module includes advanced Service and Registry Hardening for Forefront Client Security SP1 Agent using Windows 2008 Active Directory Group Policy.

Windows® 2008 SP2 Failover Clustering for Highly Available File Services - includes 17 Total Lessons running just under 4 Hours of Video Materials. Windows 2008 SP2 Failover Clustering provides Highly Available Services including File Services. In this Module a 2 Node Cluster is Installed, Configured, Modified and Monitored using 17 Tasks. These Tasks include use of System Center Operations Manager 2007 SP1 for Alerting, Monitoring and Reporting on the Highly Available File Services made available in these exercises. The Module Contents include 1) Course Syllabus, 2) Logical Diagram of the Virtualized Lab Environment and 3) 17 Tasks (separate Video Lessons) that make available the Highly Available File Services on a 2 Node Windows 2008 SP2 Failover Cluster.

All lessons are recorded directly from screen using servers and workstations running in a virtualized lab environment (you see all these in the conceptual diagram that is part of your purchase material). Each configuration is unique and includes approximately 75% of the course material recorded directly from the server console or command line. Advanced topics. Advanced configurations. Advanced techniques.
