

Papa John's Pizza In Manchester, Nh Cuts Energy Cost By 40% With The Ecube Energy Saving Device

Papa John's the international pizza restaurant company is helping to make our world a greener place to live starting in Manchester, New Hampshire thanks to a new energy efficient device called "eCube" distributed by Live Wire Energy Solutions.

May 25, 2010 - [PRLog](#) -- The eCube reduces energy consumption on commercial refrigerators and freezers from 10% to 30% and reduces compressor cycles up to 85% helping to prolong the life of the refrigeration equipment and reduces carbon dioxide emissions.

"When a friend of mine told me about the eCube and the advertised savings I was very skeptical" said Jimmy Astarita of Pizza Ventures, LLC. Manchester, NH Owner/Operator of the Papa John's restaurant. "I wanted to see the results for myself before investing in the eCube for my restaurants."

A test was conducted at the South Willow St. location that logged temperature and compressor usage before and after the installation of the eCube. The results yielded a 40% reduction in energy usage, 84% reduction in compressor cycles that will eliminate 2,872 pounds of carbon dioxide annually. This accounted for a decrease of over \$80 in the monthly electric bill and a return on investment in less than six months. "After reviewing the results I was convinced the eCube lived up to its claims for energy efficiency and I am always looking for ways to reduce my energy cost and do something good for the environment." Says Jimmy Astarita

The eCube energy device has been tested and installed nationally in restaurants, convenience stores, refrigerated trucks, hotels, flower shops, grocery stores, fast food restaurants, and other commercial refrigeration applications. Since the initial Papa John's restaurant test eCubes have been installed in all Papa John's locations owned/operated by Pizza Ventures, LLC.

About Live Wire Energy Solutions

Live Wire Energy Solutions was founded in November 2009 to bring energy efficient products and services to schools, hospitals, restaurants, refrigerated trucks, government, commercial and industrial businesses. With energy demand at an all time high and energy costs increasing Live Wire Energy Solutions has products and services to help reduce your energy cost, prolong the life of your equipment, reduce your carbon footprint and do something good for the community and our future. You can learn more about Live Wire Energy Solutions on their website www.livewireenergysolutions.com or call them at 603-731-2120.
