

Apple iPhone 4 - Light Years Ahead Of The Competition

By Chris Westley

Dated: Jul 23, 2010

Known the world over, recognizable by almost anyone whom has watched TV or accessed the internet within the last three years, the Apple iPhone, most specifically the Apple iPhone 4, has come to be known as a smartphone powerhouse.

Known the world over, recognizable by almost anyone whom has watched TV or accessed the internet within the last three years, the Apple iPhone, most specifically the Apple iPhone 4, has come to be known as a smartphone powerhouse.

With ten thousand apps, luxurious touchscreen technology, five megapixel camera with LED flash, 720p HD video recording, GPS locator, Wi-Fi support, and built-in YouTube player, this smartphone is the quintessential device for technology lovers and social networking enthusiasts alike. And with blazing fast speed and reliability, it's no wonder why this mobile phone is the most recognized and best-selling device in the world.

----Features

10,000+ Apps

The Apple iPhone 4 has one of the largest application databases available to it, what with over ten-thousand applications available for download at any given time. Applications range from Pac-Man to live video streaming apps that enable two iPhone users to simultaneously stream video to each other from each other's cameras.

Advanced Touchscreen Technology

The glass touchscreen featured on the iPhone 4 is one of the most advanced in the mobile phone industry, offering seamless reliability and ease-of-use in any application. Its 3.5-inch surface plays 720p video flawlessly and beautifully, offering clarity and precision so common with Apple products and services today.

Five Megapixel Camera w/ LED Flash

Mobile phone users are rejoicing around the world as their prayers are finally answered with the Apple iPhone 4 and its stunning five megapixel camera. Taking pictures that resemble 720p quality, this camera rivals even that of more robust 8.1 and 12.1 megapixel cameras featured on other smartphones. Mobile phone users can also record video in 720p with thirty frames per second, something rarely seen before in the smartphone arena.

GPS Locator

As has become standard on the iPhone series of phones, the iPhone 4 comes standard with a GPS locator, ensuring customers' ability to locate their position wherever they go, whether it be within the United States or deep in the Amazon.

Wi-Fi Support

Another feature standard on Apple's iPhone series, the iPhone 4's built-in Wi-Fi support can locate and connect to any Wi-Fi hotspot at any time, something proven very, very useful for business administrators and IT departments. This becomes very handy when uploading large files to sites such as Facebook and YouTube, with file size sometimes reaching several gigabytes.

720p HD Video Recording

New to the iPhone series, mobile phone users can now point-and-shoot High Definition video at any time, something praised by video enthusiasts everywhere. Video playback on the iPhone is superb as well, lending its quality to the large, high quality LCD screen.

---In Retrospect

In retrospect, the Apple iPhone 4 is a phenomenal mobile phone for anyone, offering a vast array of entertainment options and customization features. With the introduction of 720p HD video technology, more apps to choose from, flawless camera features with LED flash, and plenty more standard and exciting options to choose from, the iPhone 4 is perfect for just about any mobile phone user out there.
