Carpet is more affordable online because online retailers do not have to pay extra overhead expenses that store locations would normally expect to pay. Savings like these get passed onto customers.

A few things customers will have to keep in mind:

**Dimensions** - How much carpet is needed? People will need to measure or get someone handy to measure for square footage, so a customer knows how much carpet to purchase.

**Shipping** - Having a set of hands available to help move heavier rolls of carpet is a good idea. A place to temporarily store the carpet until it is installed is also something to keep in mind.

**Installation** - It will be smart to have a carpet installation professional to have scheduled for installation.

After the carpet arrives is a good time to have the carpet installed. Carpet tiles are easier to install and can be done by a craftsman.
