About Coral:

Coral is an organic substance and it is not a mineral. Coral Gemstone may be found in several colors. Its temperature is hot. Coral gemstone creates many virtues like courage, perseverance, capability to face and solve circumstances and problems and enables a man to take risks. Coral gemstone is referred to as an ideal for a happy marital life.

Coral gem is found in the shape of vine branch at about 600-700 feet deep into the sea. Scientists regard it as a component of calcium carbonate.

Coral gemstone is useful for enhancing self-confidence, administrative capability and the power of utilizing the rights in social & political spheres. Coral gemstone is beneficial in deals involving
