

Cardiff Sports Nutrition Launches the Brand New USN Range of Bodybuilding Supplements

Cardiff Sports Nutrition, a UK based supplier of bodybuilding supplements, announced today that they would now carry USN's lineup of sports nutrition products on their brand new website.

Aug. 31, 2010 - [PRLog](#) -- Cardiff Sports Nutrition, a UK based supplier of bodybuilding supplements, announced today that they would now carry USN's lineup of sports nutrition products on their brand new website. USN is a leader in the supplement industry and produces a wide range of premium products for professional or amateur bodybuilders and weekend warriors.

According to Cardiff Sports Nutrition, USN's line of award winning bodybuilding supplements will be a welcome addition to the store's inventory. "Our customer's know what they want, and when they asked us to carry USN's range of products, we listened. Effective immediately, we will begin selling many of USN's most popular products on our brand new website, including Anabolic Nitro, Muscle Fuel Dynamic and Pure Protein IGF-1. These products represent the best of the best in the world of sports supplements, and we're very excited to make them available to all of our customers in the UK at rock bottom prices," said a company spokesman.

"Anabolic Nitro is one of the products that helped to make the USN brand famous," said the spokesman for Cardiff Sports Nutrition. "Supplements like Anabolic Nitro stimulate and enhance the body's natural production of nitric oxide (NO). This increased NO production results in a number of benefits for the user. The primary benefit is that it gives the bodybuilder an explosive increase in energy, due to greater blood flow."

The spokesman went on to say, "As you know, our blood carries the oxygen our muscles need to function, and when the blood flow is increased thanks to higher levels of NO, the bodybuilder is able to power through even the most intense workouts. The increased blood flow also results in the faster delivery of vital nutrients to the muscle tissue, which allows it to regenerate and recover more quickly after each workout. This allows the bodybuilder to train more often and experience profound gains in muscle mass in a very short period of time. Those gains will be far beyond anything that would be possible without using an NO booster like USN's Anabolic Nitro."

"We're also very excited about USN's Muscle Fuel Dynamic and Pure Protein IGF-1," said the spokesman. "Muscle Fuel Dynamic allows the user to keep their body in a perfect anabolic state, thanks to a unique blend of high quality proteins that release amino acids throughout the day. These amino acids are vital to the building of muscle tissue and allow the user to train longer and harder, recover quicker and experience more gains in muscle mass, strength and endurance in the shortest time possible."

"Pure Protein IGF-1 is also another great protein supplement from USN," said the company spokesman. "This product benefits not only bodybuilders and athletes following a low carbohydrate diet, but also any individual who is simply interested in losing fat by supplementing their nutritional plan with a high quality source of protein, vitamins and minerals. These protein shakes are very popular in the UK and we expect them to fly off the shelves."

###

The spokesman concluded by saying, "Everyone here at Cardiff Sports Nutrition is very excited to add USN's range of bodybuilding supplements to our store. We encourage everyone to drop by our brand new website where they will be able to pick up USN's products for the lowest prices in the UK. We even offer

free shipping so check us out today.”
