

## **Chicago Dentist Acquires Latest Ceramic Dental Restoration Equipment for CEREC Tooth Restoration**

*Chicago Dentist at Dental Professionals, has purchased the latest CEREC BlueCam AC machine which will perform CEREC Restoration, which restores patients' teeth quickly, in only one visit.*

**Sept. 8, 2010** - [PRLog](#) -- Chicago's best dental practice, Dental Professionals, announced they have just purchased the newest CEREC BlueCam AC machine, a revolutionary piece of technology that allows dentists to preform **CEREC Restoration**, also known as ceramic dental restorations, while their patients wait.

Most dental restorative methods require more than one visit to the dentist. Usually, patients receive an anesthetic injection, the tooth is prepared, an impression of the tooth is taken, and a temporary restoration is put on the tooth. Then the patient must make a second appointment to remove the temporary restoration and have the permanent one installed.

**Chicago Dentist** Dr. Steven B. Kase of Dental Professionals states, "Now, with the new CEREC BlueCam AC, we're able to custom-fabricate tooth restorations even more quickly and accurately than ever before! Its camera has the most advanced optical technology available to give the most accurate optical model quicker than anything else. That allows us to give our patients a truly superior all-porcelain restoration."

He continues, "Our office is dedicated to treating our patients using the most advanced technology available and our recent upgrade to the CEREC Blue Cam AC has continued that tradition."

The Dental Professionals have been using CEREC for the past five years. The new CEREC BlueCam AC machine is available in both the downtown Chicago and Skokie office locations.

###

### **About Dental Professionals:**

Dental Professionals, one of the most advanced dentistry practices in the Skokie and Chicago, Illinois area, has been treating patients since 1980. Their Chicago Dentist practice offers:

- \* Dental Implants
