

Dryer Vent Cleaning Sacramento Wizard asks Do you Know What's in Your Dryer Vent?

The Sacramento Dryer Vent Cleaning Wizard explains how a clogged dryer vent system can make your dryer work inefficiently and cost more money to operate

Oct. 13, 2010 - [PRLog](#) -- Sacramento, CA -- Dryer vent cleaning is the only way to remove lint build-up and ensure your dryer is operating safely and efficiently. Dryer vent cleaning promotes air flow needed for maximum dryer performance. "One of the most common signs that your dryer vent needs to be cleaned is when the dryer starts taking longer to dry your clothes," said Gina Fazil, owner of Dryer Vent Wizard.

Dryer Vent Wizard specializes in cleaning, repairing and installing dryer vent systems. Gina Fazil advises her customers to clean dryer vents annually to remove lint build-up to eliminate a fire hazard and increase dryer efficiency. "Poorly vented clothes dryers cost substantially more money to operate," said Fazil.

Gina recalled a recent dryer vent cleaning service call where the customer expressed concern about increased drying time. "She was going to buy a new dryer because she thought the problem was due to aging," said Fazil. "I explained to her that even a new dryer was not going to work efficiently with poor ventilation."

Upon inspecting the dryer vent system Gina found several problems. "The first thing I noticed when I went into the basement was the flexible foil dryer exhaust duct which traveled up from the back of the dryer and then turned to head about 4 feet to the dryer vent outside. The 4 foot extension was installed at a slight decline, allowing cold air to cause steam to liquefy and become trapped in the dryer exhaust pipe. The flexible duct material, sagging between the joists allowed the lint and water to pool in a low spot and block air flow from the dryer.

Dryer Vent Wizard is the nation's largest dryer vent installation and cleaning franchise with nearly 60 locations in the U.S. Dryer Vent Wizard provides dryer vent cleaning and installation according to current safety standards to make clothes dryers operate safely and efficiently.
