

New Clay Arabesque Ceramic Tiles Offer Classic Spanish Touch

The geometrically inclined Arabesque pattern, part of our extensive ceramic tile collection, pays homage to the rich look of classic clay bisque tiles that have been used throughout Spain, the Mediterranean, and northern Africa for centuries.

LOS ANGELES - May 14, 2013 - [PRLog](#) -- Similar in their hand-crafted workmanship to our line of Arabesque Spanish Cement Tile, our **Clay Arabesque Ceramic Tile** collection pays homage to its Moorish and Spanish tile roots with deep, rich colors and intriguing geometric shapes. The clay Arabesque tiles pictured above are from Aljafería Palace, a fortified medieval Islamic palace built during the 11th century in Zaragoza, Spain. As you can see, hand-crafted clay bisque tiles are truly timeless elements.

Further adding to its inherent rustic appeal is the fact that our decorative, hand-painted **Clay Arabesque Ceramic Tile** is produced using a classic extruded red clay body. Using this method of production only enhances this collection's appeal.

Manufactured in the USA, these high-fired classic terracotta tiles offer unsurpassed flexibility as they can be customized for any décor need with traditional unglazed bisque colors, glazed bisque colors, glazed blends, and more than 50 studio glaze shades.

From contemporary to rustic, our **Clay Arabesque Ceramic Tile** collection is sure to fit any need in any setting whether it's for walls or floors, indoors or outdoors. There are 6 designs within this collection. Our online product catalog details the available styles, tile sizes, shapes, formats, color, and price for each design. Remember, each piece is handcrafted, therefore, please expect to receive them within 4 to 6 weeks from the time your order is placed.

Lastly, by using our **Clay Arabesque Ceramic Tile** in your next design project, you'll feel good knowing your choice is also good for the environment. Along with being made in the USA, this collection is made using clay sourced from California and includes 33% recycled post-industrial content.
