

Medical Coding Pro Launches Innovative New Exam Preparation Tool

Medical Coding Pro, a leader in learning tools and products for medical coding certification, has released a new exam preparation tool to increase coding speed and accuracy.

WARREN, Ohio - April 23, 2014 - [PRLog](#) -- Medical Coding Pro has launched a new exam preparation course called the Medical Coding Exam System.

The [Medical Coding Exam System](#) is designed to address the major issue students have with passing the 5 hour and 40 minute certification exam, time.

The single most referenced issue from students who have not passed the exam is not having enough time to complete it. The Exam System gets to the heart of the issue and not only increases your coding accuracy, it increases your coding speed too.

"The Exam System was created because of consistent feedback we've been receiving from students taking the medical coding certification exam. They kept asking us to come up with a solution to help them code faster and more accurately and the [Medical Coding Exam System](#) does exactly that" says President and CEO Gregg Zban.

About Medical Coding Pro

[Medical Coding Pro](#) is a leader in exam preparation solutions and has been helping students pass the medical coding certification exam since 2008.
