

Topline Innovations LLC Introduces the NEW Patented, AngLevel™ Multi-Purpose Measuring Tool

The Diaz brothers have risked everything, to start Topline Innovations™ LLC and get their first product the AngLevel™ Multi-Purpose Measuring Tool patented and ready for consumers. It is a cost effective, durable tool that features 7 tools in 1.

March 10, 2008 - [PRLog](#) -- The Diaz Brothers Overcome Natural Disaster to Release Their First Product the AngLevel™ Multi-Purpose Measuring Tool

The Diaz brothers have risked everything, to start Topline Innovations™ LLC and get their first product the AngLevel™ Multi-Purpose Measuring Tool patented and ready for consumers. Founded in 2005 their mission was to invent and manufacture an all new never before seen product, that is like no other. The AngLevel™ has far exceeded this by being the first ever multi-purpose tool of its kind. It is a cost effective, durable tool that features 7 tools in 1. The features are not only innovative but beyond compare to anything in the tool industry! Now after frustrating years of hardship, sacrifice, and surviving two natural disasters, the AngLevel™ is now available for purchase at toplineinnovations.com, and will be making it's debut appearance in the Inventors Spotlight at this years 2008 National Hardware Show in Las Vegas on May 6-8th.

This is a truly unique product; the AngLevel™ Multi-Purpose Measuring Tool is a hand tool that was "designed by contractors for contractors". Its distinctive combination of commonly used tools that increases the tradesmen's efficiency, saves space in their tool belt, while performing additional functions that other tools simply do not do. This all in one tool's main features are: Magnetic Torpedo Level (with Neodymium rare earth magnets), Speed Square, Sliding T-Bevel, Angle Measurements (0-360 in 5 degree increments), Pitch finder (1/4, 1/8, 1-20), Plumb Bob, and 16 Inch Step Off. The AngLevel™ also performs a number of functions or combinations of functions that not only provides the same functionality as more than four common and essential tools, combine in a much more efficient and simple manner, but also provides many proprietary time saving features to the user.

The AngLevel™ Multi-Purpose Measuring Tool eliminates the common problem of having to use several tools to accomplish one task when working on the job or simply doing a home improvement project through it's many time saving functions. This is a 7 in 1 tool that is great for virtually any trade including but not limited to Carpenters, Framers, Roofers, Siders, Plumbers, Electricians, Do it yourselfers and more. "It's so exciting to hear from satisfied customers thanking us and praising the quality and usefulness of the AngLevel, more and more we're discovering that it's useful to different trades and professions. AngLevel owners' are constantly discovering new ways in which our product can be used". Jeff Diaz Co-Inventor, President &CEO.

The idea for the AngLevel™ came to the brother's while working as framers and vinyl siders for Geoff's company, Topline Construction. "Our problem was that all too often to complete a single task we would have to use 3 sometimes 4 different tools, in 3 different steps to achieve what the AngLevel™ completes in just one simplified step with a single tool. We wondered why "they" [Tool manufacturers] hadn't come up with a tool for the job, then realized we should be the manufacturer", says Geoff Diaz Co-Inventor, Executive Chief Operating Officer.

Soon after they decided to put everything on the line to start Topline Innovations™ LLC and develop the AngLevel™ "Once we had a working prototype we knew we could help to ease other people's frustrations on the job. It's been a long road we quit our jobs, refinanced our homes, and put our life savings into the

company. Then when it all seemed to be coming together, we had to overcome tragedy. We virtually lost everything after being hit hard in two presidentially declared flood disasters a year apart that nearly claimed my home and everything we had worked for twice, as my brother and I have struggled and still struggle, but we keep in mind that the more we endure, and bigger the sacrifice, will make achieving SUCCESS that much more sweet.

” Jeff Diaz Co-Inventor, President &CEO.

Despite all this they have overcome the obstacles and invented, patented, manufactured and are now ready to distribute the AngLevel™ Multi-Purpose Measuring Tool, an extremely unique tool that’s bound to have an impact on the market, and on its consumers work days. The AngLevel™ Multi-Purpose Measuring Tool is now available for purchase at toplineinnovations.com for \$ 29.99, will be making its debut appearance at this years 2008 National Hardware Show in Las Vegas on May 6-8th and will be featured The Inventors Spotlight .
