**Sept. 24, 2008 - PRLog** -- The Salt Lamps from Pelham Grayson Inc are made from salt crystal rock formed by nature over hundreds of millions of years ago, and mined 800 meters underground in salt rock mines. These natural mineral Salt Crystals are collected from one of world oldest mines of rock salt. They are carefully shaped to retain the unique, natural shape and crystal structure of the salt rock. Therefore, each salt lamp displays its own unique beauty. Beautiful and millions of years old the, salt rock crystal, is known for its ability to ionize the air, thus enhancing your well being and improving your health. Negative ions are essential for our health and well-being. The freshness of the air after a thunderstorm, on a mountain top, or by the seaside, is due to the high concentration of negative ions in the air. On the other hand, the reduced well being one feels in highly polluted areas, artificially air conditioned offices, or when certain hot dry wind conditions exist, are usually due to an unduly low negative ion balance.

In addition, crystal salt is believed to help in the cure of many diseases. Bioenergothrapists and homeopaths in Western Europe have recommended crystal salt lamps for a long time to support treatment of allergies, respiratory system and blood system diseases. They are often used in the treatment of rheumatism. Due to its beautiful and rich colors, salt lamps are also used in the color therapy, i.e. chromo therapy. Their soothing light helps neurotic persons and people suffering from insomnia. Feng Shui art connoisseurs have also appreciated the lamps.

Pelham Grayson Inc is pleased to announce that it is extending its wholesale store price to the public for the first time. Save 50-70% from regular retail prices while supplies last.
