

## **Cellphone SIM card reader (USB) - Find out what someone is doing on there phone!! (SIM100)**

*MGI - Ever wondered what someone is texting, calling with there cellphone - now you can find out. Check up on your girlfriend, spouse, children, boyfriend, anyone.*

**Nov. 14, 2008** - [PRLog](#) -- Save, edit and delete your phone book and short messages (SMS) stored on your SIM card using the Recovery PRO software and SIM Recovery Pro Reader with your computer and ANY standard SIM card from a standard cell phone which supports removable SIM cards. Have you ever wished you can spy on your wife, husband, teens, or an employer who needs to see what someone is up to? Are they being suspicious when on their cell phone? This SIM card spy software and hardware solution can tap into all files on a cell phone SIM card for viewing, saving or editing. Simply place the SIM card into the USB reader and with your computer, instantly save for later or view immediately. Backup your mobile phone numbers and SMS messages to your PC, another SIM card or any removable media. Cell Phone Data Recovery alternatively, you may want to use this as a more efficient way to manage your own cell phone contacts, phone numbers and personal information or as a SIM card data recovery backup. If you change your mobile phone or service provider and receive a new empty SIM card, this SIM card solution is the best way to load the new saved data onto it. Editing your SIM card entries has never been easier when doing it on your PC with the computer's keyboard instead of your mobile phone keypad. Don't Be Fooled By Imitations and False Claims!! This is the only SIM Card reader in the world that can actually see the deleted messages. ; FAQ: How many deleted messages will I be able to recover? Answer: Everything that is available to be recovered! Just like deleted files on a PC hard drive, as long as the deleted data on the SIM card hasn't been written over by a new file, it can still be retrieved. Some SIM cards hold more data than others, which is a factor in total amount of data. A 64k card from ATT for example can hold multiple pages of data. A SIM card memory sizes will vary by phone / carrier. However, the CELL PHONE SPY is guaranteed to recover all and any deleted text message data that still resides on your phones SIM card. There are no other SIM CARD SPY products on the market today that will be able to view / recover as much deleted data from your SIM card as the SIM CARD SPY will recover off your SIM Card. Due to the extensive range of mobile phone handsets and the way these handsets manage SMS text messages, we can not guarantee that this product will recover data from every SIM card. However, we have recovered a substantial amount of deleted text messages from all the SIM cards tested.
