Cell Therapeutics NEWS – December 1, 2008

Penny Stock Alert: Cell Therapeutics Granted Priority Review Status From FDA. Seattle, WA.,-- Cell Therapeutics, Inc. announced this morning the U.S. Food and Drug Administration (FDA) has accepted for filing and review, and has granted priority review status for, the supplemental Biologics License Application (sBLA) for use of Zevalin(R) as consolidation therapy for patients with follicular B-cell non-Hodgkin's lymphoma who achieve a response to first-line therapy.

Cell Therapeutics, Inc. markets lymphoma drug, Zevalin, in the United States. Zevalin is an FDA-approved radioimmunotherapeutic for treating lymphoma. The company also develops, acquires, and commercializes novel treatments for cancer. In addition, Cell Therapeutics develops XYOTAX for the treatment of non-small cell lung cancer and ovarian cancer; Pixantrone, a novel compound in the class of drugs known as anthracyclines, for non-Hodgkin's lymphoma; and Brostallicin, which is in first-line Phase II study for the treatment of sarcoma. It has collaboration and licensing arrangements with Novartis International Pharmaceutical, Ltd. and PG-TXL Company, L.P.

If approved, ZEVALIN would be the first radioimmunotherapy available to patients as first-line consolidation therapy. It is estimated that there would be approximately 18,000 additional patients that currently receive first-line treatment which would potentially be eligible to use ZEVALIN under the proposed expanded label. Together with ZEVALIN's current approval as treatment for patients with relapsed or refractory, low-grade or follicular B-cell non-Hodgkin's lymphoma (NHL), including patients that are rituximab-refractory or rituximab-naive, approval of ZEVALIN as first-line consolidation therapy will allow ZEVALIN to be used in several lines of NHL therapy.

Investor's are urged to watch for early movement with this stock as it closed Friday November 29, 2008 at \$0.16 per share.
