

Topearl's Tips Of Restoring Pearl's Luster

Although the color of pearls is very beautiful, but they can not stand the test of time. Now Topearl.com tell you some methods to restore pearl's luster

Jan. 21, 2009 - [PRLog](#) -- Although the color of pearls is very beautiful, but they can not stand the test of time. After decades of general, the pearl will become the common yellow, losing beautiful pearl luster, and that is saying the word "Renlaozhuhuang."

Why Pearl jewelry become yellow after a long time? This is mainly because pearls of the physical properties of mineral aragonite unstable over time, it will become common calcite. Aragonite calcite together, although the same chemical composition, and their crystalline form and as little luster. This is the pearl color. After the yellow pearls, there are a number of remedies, that is soaked with hydrochloric acid, in this way can dissolve the yellow shell, which reproduce crystal pearl brilliant, fascinating glory of color. However, if the color very much, it will be difficult to reverse.
