Windsor Exports was founded in early 1996 with the desire to make available worldclass auto components and agriculture machines that are produced in India. Our target, though difficult, was clearly defined. For any requirement from abroad our target is to achieve the best quality, finish and packaging standard of the best brand available in that particular market. We have a reputed name in Foreign Market for Rubber Hoses & Hydraulic Hoses, Agricultural machines, Diesel Engines, Generators, Pump & Pump sets (Submersible, Turbine), Blower type Engine, Agricultural Spare Parts and Farm Equipment. In past 10 years, we have achieved our first goal of being rated as 2 star Export house and with a Vision of achieving Five star by 2015. We Manufactured as per the specifications of our clients, our range of hydraulic industrial hoses is technologically advanced equipment to convey fluid under pressure. Available with or without end connections, these hoses are widely used for industrial or general purpose fluid transfer. Fabricate with he range of extreme pressure braided hydraulic hoses we offer to clients are made by using state-of-the- art manufacturing equipments. All the products can also be made as per our customer's requirement and specifications within shortest time period. These hoses are used in automotive. Our premium product hydraulic hoses are specifically designed for supplying hydraulic fluid's to hydraulic components, valves, actuators etc. They are oil resistant and synthetic rubber reinforced with one/two ply braided high tensile steel wire covered with oil, weather and abrasion resistant.
