Foldable Boat - Porta-Bote

Unique Hi-Performance Porta-Bote folds to 4 inches (11 cm) flat. Ideal for the fishing, diving, boating, sailing, hunting, military, rescue and camping enthusiast who lacks the space to store or transport ordinary boats

May 8, 2009 - PRLog -- Porta-Bote can be assembled and ready to go in 15 minutes. Portaboat is more stable than a rigid craft. It's puncture resistant and even sharp rocks won't damage the unique almost indestructible FLEXI-HULL. Made of high-impact polypropylene, a remarkable engineered resin developed by the aerospace industry that is virtually puncture-proof and unaffected by salt, acid, almost everything. Flexibility is the secret to its stability. When a wave slams against the side of Porta-Bote Flexi-Hull, the nearly 1/4"-thick polypropylene flexes inward, dissipating the energy. No maintenance required. The colour goes completely through-never needs painting. FOR MORE INFORMATION, LOG ON TO www.portaboteme.com
