

## **Dr. Chili Robinson Discusses Benefits of Nutational Infrasonic Liposuction (NIL) to Treat Fat**

*Dr. Chili Robinson Discusses Benefits of Using FDA Cleared Nutational Infrasonic Liposuction (NIL) Technology in the Treatment of Fat With Fellow Physicians at The Aesthetic Show 2009 in Las Vegas*

**June 17, 2009** - [PRLog](#) -- Dallas, TX -- Chili Robinson, MD introduces Nutational Infrasonic Liposuction (NIL), a new proven form of liposuction to the United States at The Aesthetic Show 2009 in Las Vegas. Already one of the most popular forms of liposuction for years in Europe, Dr. Robinson states, "Since 1981, I have used most of the liposuction technologies on the market. Now I am very excited to have access to this proven tool. While working with physicians in Europe I was able to gather the data and the experience I needed to implement NIL into my practice. I recommend NIL to other physicians as part of their aesthetic procedures offering." Liposuction is the third most popular aesthetic procedure in the US, totaling 314,000 procedures in 2008, according to the American Society of Plastic Surgery.

A Belgium liposuction surgeon developed NIL when he sprained his elbow and needed to replace muscle effort with technology. Now the objective is aiding the physicians' performance while significantly decreasing the physicians' effort. The nutational infrasonic principle allows the removal of the fat tissue without harming any other tissues; the result is a shorter post-operative period. It also allows better precision in difficult to access areas such as the area near the ribs. It is effective where there is more fibrotic tissue such as secondary liposuctions, prior C-Sections and male liposuctions. It markedly reduces the risks inherent to other lipolysis techniques, as the cannulas do not heat up, thereby avoiding the danger of skin burning and necrosis. Another advantage of NIL is that it avoids damage to healthy fat cells so they can then be used elsewhere in the body during fat transfer procedures.

NIL uses a cannula powered by air pressure, which drives the tip in reciprocal, rotation and vibration directions. This triple movement "nutation," morselizes the fatty tissue allowing easier evacuation. Emulsification is avoided, thus preserving the viability of the fat cells. Less trauma minimizes edema and swelling, resulting in a faster recovery. Most importantly, the tri-plane vibration stimulates collagen synthesis, facilitating postoperative skin tightening.

### About Dr. Robinson

Dr. Robinson is certified by The American Board of Plastic Surgery and has been in practice and performing lipoplasty for over 25 years. Dr. Robinson performed cosmetic procedures at his Aesthetic Plastic Surgery Institute in Corpus Christi, Texas for 25 years before moving to the Dallas Metroplex where he currently practices at Timeless Medical Spa and Advanced Fitness Spa. Dr. Robinson's missionary work has taken him to The Ukraine, to teach other surgeons to repair cleft lips and palates. His "passion" lead him to Central and South America, on numerous occasions to surgically improve the lives of others. For his mission work he was honored in 2000 with a nomination for the National Jefferson Service Award. Dr. Robinson ([www.chilirobinson.com](http://www.chilirobinson.com)) currently serves as Medical Advisor for the groups distributing Nutational Infrasonic Liposuction, NIL.

### About Nutational Infrasonic Liposuction, Inc. (NIL)

NIL ([www.nilnow.com](http://www.nilnow.com)) is one of the most recent liposuction techniques introduced to the US and has been used in thousands of procedures worldwide since 2000. It is safe, effective, precise and cost effective. The morcelization principle allows the removal of the fat tissue without harming any other tissues; the result is a shorter post-operative period. It also allows greater precision in difficult to access areas or where there is much fibrosis such as secondary or male liposuctions. The US Food and Drug Administration (FDA) provided NIL 510(k) clearance for the removal of soft tissue and fluid from the body during general surgical procedures including suction lipoplasty for aesthetic body contouring. NIL is distributed in the

United States by a group of companies including Medical Alliance Services (866) 981-5017 ext: 701.

#### About The Aesthetic Show 2009

The Aesthetic Show™ is the first truly multidisciplinary medical/education meeting focused on the rapidly expanding field of aesthetic medicine. This unique show brings together new procedures, products and technologies, as well as a group of top physicians in the aesthetic practice of Plastic and Cosmetic Surgery, Dermatology, Family Practice, Obstetrics/Gynecology and Medical Spas where they meet to exchange new ideas in a highly condensed and effective venue.
