

Metageek Wi-Spy 2.4i launched in Canada - for only \$109

Need basic 2.4 GHz spectrum analysis, but don't want to scrimp on performance? Wi-Spy 2.4i packs a lot of value in a compact package with extra-fine resolution to help you get to the bottom of interference issues quickly and easily.

June 17, 2009 - [PRLog](#) -- Winnipeg, Manitoba – Need basic 2.4 GHz spectrum analysis, but don't want to scrimp on performance? Wi-Spy 2.4i packs a lot of value in this compact package with extra-fine resolution and a super-low noise floor not seen on other entry-level tools. Plus, Chanalyzer Lite, Wi-Spy 2.4i's software, offers a great assortment of features that help you get to the bottom of interference issues quickly and easily.

Futura GTS (<http://www.wi-spy.ca>), Canadian distributor of the Wi-Spy line of Wi-Fi spectrum visualization tools, has launched the Wi-Spy 2.4i as a lower cost option to its popular Wi-Spy 2.4x. The 2.4i replaces the Wi-Spy v1 and adds much greater resolution and new software - Chanalyzer Lite. Chanalyzer Lite is easier to use, provides more ways to view the data and to top it off, there is now a 3-D view and Mac support.

Wi-Fi Planet says "This bargain-priced analyzer... gives even small companies an affordable way to find and resolve RF interference problems that plague the 2.4 GHz 'junk band.' "

###

About Futura GTS

Based in Winnipeg, Manitoba Canada, Futura GTS is a family owned and operated Value Added Reseller that strives to provide reliable and cost effective computing solutions. With customers ranging from SOHO to Enterprise, Futura appreciates the value of products like the Wi-Spy spectrum analyzers that allow technicians to troubleshoot wireless network issues quickly and easily.
