

GRNY Renovation Raises Home Value For Clients With Kitchen Renovation & Bathroom Remodeling Service

Professional kitchen renovation, bathroom remodeling, and other home improvement services by GRNY are helping clients to increase the resale value of their homes in order to remain competitive in the current real estate market.

July 30, 2009 - [PRLog](#) -- Forest Hills, NY - GRNY, a New York-based leader in home remodeling and renovation, has been providing professional home improvement services to improve real estate value for clients in Manhattan and throughout the Greater NY area.

According to company officials, the kitchen and bathroom are the most influential rooms in a home, and can have a significant impact on the buyer's decision to make a purchase.

"We've seen it time and time again," reports Mr. I Koch, owner of GRNY. "Homes that have professional kitchen remodels and bathroom renovations are quick to sell, while those that lack desirable features such as backsplashes and modern fixtures remain on the market for longer. In the current real estate market, the buyer has more choices, which means that the seller must make more of an effort in these key areas of the home."

Koch emphasizes that kitchen remodeling and bathroom remodeling, while popular among home sellers, is not limited to these types of clients. "Rather than upgrading to a larger home, many of our clients are choosing to instead remodel their kitchens and bathrooms for long-term property value. Our team works with them to transform an outdated kitchen or bathroom into an oasis of luxury, function, and style."

In addition to kitchen renovation and bathroom remodeling, Koch says that clients choose to add resale value with painting, flooring, decks and patios, and other general carpentry upgrades.
