2009 Analysis Report on China Solar Grade Multicrystal Silicon Industry

In the report, we introduced their productions & sales from now till 2011 for China & Global market, poly silicon manufacture technology history, today, & future low cost technology. Give detail information analyst on experimental technology...

Aug. 10, 2009 - PRLog -- Summary

In the report, we introduced their productions & sales from now till 2011 for China & Global market, poly silicon manufacture technology history, today, & future low cost technology. Give detail information analyst on experimental technology of poly silicon. (especially low cost technology), what is more, we also introduce the building & planning projects of China & global poly silicon factories. And we also give our remark or opinion on the planning or building project whether succeed of the factories yield technology. According these analysts we can give good forecast of poly silicon products demand sales & shortage data in the coming 5 years. Though almost all biggest poly silicon vendor expanded their production capacity these years, there are also a lot shortage of global poly silicon, so more & more new enter come in this industry & all of them need manufacture technology, but almost all the biggest vendor will not transfer their technology to others, so the new enter need develop their own technology, but as we all know, it is not an easy thing to develop a new technology for poly silicon manufacture, so this largely limited the product expanding of poly silicon.

Table of Contents

Chapter 1 Summary of Polysilicon
1.1 Definition
1.2 Classification and uses
Table: Differences of parameter between that of EG Silicon and SG Silicon Table: Differences of parameter between that of EG Silicon and SG Silicon
Table: Purity quotient demand of MG silicon, SG silicon and EG silicon and the average price of 2007 (USD/kg)
1.3 Industrial chain structure
Chart: Industrial chain structure of silicon product
Chart Industrial chain structure of polysilicon production technology (sand-polysilicon)
Chart: Industrial chain structure of polysilicon industry (raw materials and downstream application)
Summary of the proposal for the project of over 1000 tons polysilicon, Hezhou, Guangxi, China
Table Distribution of output unit price (US$/kg) of elemental silicon of the world
1.4 Differences between polysilicon and singlecrystalline silicon
Table: The Differences of parameter between polysilicon and singlecrystalline silicon
Table: The differences between singlecrystalline silicon solar energy battery and polysilicon solar energy battery
Chapter 2 Production Technology and Technology Analysis of Polysilicon
2.1 Summary of polysilicon technology
2.1.1 Technology category and distribution
Chart: Output and proportion of global polysilicon produced by different technologies in 2006
Table: Contrastive analysis on principles of polysilicon production technology of Siemens method, Silicon hydride method and Fluidized bed method
Table: Contrastive analysis on principles of SG production technology of Metallurgy method, Vapor-liquid deposition method and Heavily-doped silicon scrap purification method
2.1.2 Analysis on the technology distribution of the polysilicon enterprises in the world and in China
Table: Chart of the technology of the global 12 polysilicon enterprises and their output in 2008
Table: The production technology of the 7 global polysilicon tycoons and corresponding chemical equation principles
Table: Chart of the production technology of some of the polysilicon enterprises and forms of the products
Table: New technology of several kinds of the Solar Grade Silicon and the developing enterprise
Table: main purification methods of the polysilicon of the 7 global tycoons
Chart Differences of polysilicon production process between JFE (NKK and Kawasaki combined) metallurgical method and traditional Siemens method
Table: Technology and productive capacity of three polysilicon enterprises in China
2.2 Polysilicon manufacturing technology
Table: Process flow chart of Siemens method of polysilicon production
Chart: A schematic representation of MG silicon technology
Chart: Structure of MG silicon technology
Chart: High-purity silicon production process of Siemens method
Chart: A schematic representation of reaction in Siemens reactor
Chart: A schematic representation of silicon reducing furnace operating
Chart: Process flow chart of wafer-IC chips
2.3 Production Technology of Singlecrystalline & Multicrystalline Silicon
Chart Operation Principle and Structure of the Crystal Pulling Furnace
Chart: The operation principle and the structure of the CZ method crystal pulling of the single crystalline silicon
Chart: Process of Solar Silicon material ´C FZ method
Table: A contrastive analysis of crystal pulling technology of CZ Si and FZ Si
Chart: Structure and a schematic representation of production process of directional solidification solution (DSS) of poly silicon (Multi-crystalline Silicon Ingot)
Chart: Structure and a schematic presentation of EMC production process of Multicrystalline Silicon Ingot
Chart: A schematic representation of EMC technology of Multicrystalline Silicon Ingot
Table: Contrastive analysis of technological characteristics of DSS, FZ Si, CZ Si and EMC
Chart: Finished products of polycrystalline silicon ingot and parameter information concerned
Chart: A process flow chart of Polysilicon-Multicrystal silicon wafer-solar cell
2.4 Production technology of wafer
Chart: The principle of cutting silicon and the structure of cutting machine
Table: A chart of wafer items and methods
Chart: Multicrystal silicon wafer, the process flow chart
Chart: Wafer, the flow chart of solar cell process (180 micron)
Chart Global wafer shipment area (100 million square inches) and sales amount (million US$)
Chart: Shipment area (hundred million square inches) and respective proportion of Polished wafer, Epitaxial wafer and Nonpolished wafer all over the world in 2006
Chapter 3 Analysis on the Present and Future Market of Multicrystalline Silicon Ingot
3.1 Overview of the production and supply of multicrystalline silicon ingot
3.1.1 The output of the traditional seven magnates
Chart: The total output and growth rate of multicrystalline silicon ingot of seven worldwide traditional magnates in 2004-2011
3.1.2 The output of seven multicrystalline silicon ingot projects in Europe, USA and Korea
Chart: The total output and growth rate of multicrystalline silicon ingot of seven projects in Europe, USA and Korea in 2007-2010
3.1.3 The output of four multicrystalline silicon ingot projects in Japan and Russia
Chart: The total output and growth rate of multicrystalline silicon ingot of four projects in Japan and Russia in 2006-2011
3.1.4 The output of 11 multicrystalline silicon ingot projects in China
Chart: The total output and growth rate of multicrystalline silicon ingot of 11 projects in China in 2004-2011
3.1.5 The total output of multicrystalline silicon ingot in the world
Table: The worldwide output distribution between electronic grade and solar grade multicrystalline silicon ingot in 2005-2012
Chart: The total output and growth rate of multicrystalline silicon ingot in the world in 2004-2011
3.1.6 The output of electronic grade multicrystalline silicon ingot
Chart: The total global output and growth rate of electronic grade multicrystalline silicon ingot in 2004-2011
3.1.7 The output of solar grade multicrystalline silicon ingot
Chart: The total global output and growth rate of solar grade multicrystalline silicon ingot in 2004-2011
3.2 An overview of multicrystalline silicon ingot demand
3.2.1 An overview of multicrystalline silicon ingot demand
Table: The average price of the global solar battery/panel/crystalline silicon battery/non-crystalline silicon battery output and solar panel/system in 2005-2012
Chart: The global output (GW) and growth rate of solar battery/panel in 2004-2011
