###

Windsor was founded in early 1996 with the desire to make available world class autoparts that are produced in India. Our target, though difficult, was clearly defined, for any requirement from abroad we will achieve the quality, finish and packaging standard of the best brand available in that particular market. We transcribed the product through metallurgy, manufacturing process, treatment etc. to withstand in physical tests for each item. We supplemented the product with finest detailing, such as Bar Coding, to give the product our name 'WINDSOR', at affordable price to market. The results were gratifying and in short span of time our products have been acknowledged as of the highest quality coming out of India and indeed not very short of the world's best brands. We are now perhaps one and the only company in India to have developed over 450 items for automotive application, that too just in a period of two years.
