

## **Wait! Is Financial Destination a Scam? The Shocking Truth Will Surprise You!**

*Is Financial Destination a Scam! Investigate the Validity for yourself and discover if Financial Destination fits the criteria of a Scam. Would a Mission to Stamp Out Financial Literacy be a Scam? Financial Destination Scam, The Truth Revealed!*

**Nov. 23, 2009** - [PRLog](#) -- What exactly is a Pyramid Scheme?

A pyramid scheme is a non-sustainable business model that involves the exchange of money primarily for enrolling other people into the scheme, often without any product or service being delivered.

However, legitimate network or multi-level marketing businesses can be distinguished from illegal pyramids by their compliance with these three criteria:

1. Substantial sales of products or services to end users
2. Commissions paid on product/service usage
3. Company buys back the inventory of terminating participants

What I have found regarding complaints about Legitimate Network Marketing companies is that the person complaining:

1. Was never part of the program
2. Doesn't know the real definition of a Pyramid Scam
3. Is generally disgruntled
4. Clueless
5. Is unsuccessful in their current JOB or Business

Would a Mission to Stamp Out Financial Literacy be a Scam?

## Health and Wellness

### "Just Plain Common Sense"

Everything on Planet Earth is composed of mineral elements, the food we eat, the fluids we drink, the clothes we wear, the cars we drive, even the air we breathe. Literally EVERYTHING is composed of mineral elements.

Our bodies are composed of individual cells. Some cells are specialized, like brain cells, blood cells, bone cells, and tissue cells. In turn, these individual cells are composed of mineral elements. The cells must have mineral elements supplied to them daily in order to produce hormones, amino acids, proteins, and other diverse chemicals. The cells of the human body are miniature chemical factories. But like any other factory, nothing is produced or built without essential raw materials. The minerals offered by WellnessTRAX are the raw material for the various cellular factories.

A healthy human body is dependent on proper nutrition that must be supplied every day. Clean air and clean water are basic to good health, but so is consuming food rich in mineral elements. This is the foundation of a person's health and vitality. Sadly, our modern diets are largely deficient in the critical mineral elements. As a result, many people experience ill health or debilitating disease states. They then turn to modern medicine for a quick chemical silver bullet to make them well. Often, this leads to other problems, and a tragic downward spiral results. In order to function, many people are convinced they must take prescription chemical drugs for the rest of their lives. They do not understand that the root cause of their afflictions may well be specific mineral deficiencies. They do not understand that specific mineral supplementation may repair their affliction. Sadly, these basic truths are too often hidden by the pharmaceutical giants that have a multi-trillion dollar stake in keeping large segments of the population dependent on their chemicals. If minerals can truly help the body to repair and regenerate, why would society need to spend money on camouflaging chemicals??

Our mission is to declare these basic truths to the world, and let the people decide for themselves if they are valid in their lives or not. As Hippocrates declared: "First, Do No Harm". Each mineral supplement in the WellnessTRAX family has been shown to be safe for human consumption, in small amounts sublingually applied. They are born of Planet Earth. They are not chemically altered or changed. They are 99.99% pure. We invite you to make them a part of your life, and see if they make a difference in your health and vitality.
