

EVDense Corporation and Admission of Electronically Stored Information as Evidence

EVDense Digital Diary uses best practices for collecting electronic information to be used as evidence.

Dec. 3, 2009 - [PRLog](#) -- Seattle, WA – EVDense Corporation, experts in legal technology and eDiscovery Business Intelligence Process Design workflow, identifies best practices for storing and submitting electronic information as evidence. EVDense Corporation’s legal expert Craig Kobayashi recently met with eDiscovery expert James Yand of Stafford Frey Cooper in Seattle, Washington to discuss a workflow designed by EVDense, “Admitting Electronically Stored Information (ESI) as Evidence.”

The EVDense workflow is based on legal and academic references, federal regulations and precedent cases, including *Lorraine v. Markel American Insurance Company*, 241 F.R.D. 534 (D. Md. 2007). With over 75 discreet steps over five phases, the workflow shows every action involved in storing and submitting electronic information as evidence. “EVDense has not left a stone unturned identifying how electronic information should be stored and submitted to the courts. This will be a great asset to judges within the Washington State court system,” says Yand.

The EVDense Digital Diary service is built on the EVDense workflow for admitting ESI as evidence. “Based on our understanding and with validation from experts like Jim Yand, we know the EVDense Digital Diary is the best practices way to collect and store electronic information to be used as evidence,” said Roger Yee, Co-CEO of EVDense Corporation. The EVDense Digital Diary is currently free and it is very easy to use. Log and collect the information that matters and start protecting yourself today.

About EVDense

EVDense Corporation, headquartered in Seattle, Washington, is a leader in Software-as-a-Service (SaaS) applications for securely creating, storing, and retrieving electronic files and documents. The EVDense team has decades of experience in the legal technology industry, and is advised by seasoned legal experts. EVDense products include Ixio Legal QShift and Business Intelligence Process Design consulting for business class customers, and EVDense Digital Diary for consumers to create and store electronic information as evidence.
