

Steel Construction Design, Structural Design For Steel Construction

Effective and affordable steel construction design services. Avail free unlimited revisions in order to customize the design to your satisfaction. Customer centric approach and quality steel design solutions at low cost.

Jan. 22, 2010 - [PRLog](#) -- Looking for effective steel construction design and structural steel design services? We are trusted choice of architects, steel fabricators and building contractors for providing quality structural cad solutions at affordable rates!

Over last 5 years, Outsourcing Steel Detailing firm has established itself as a multi-discipline engineering consultancy firm, undertaking many simple to complex structural engineering projects in USA, UK, Australia, Canada and across the globe. We provide **complete structural details to designers and fabricators to bring their structures to realization.** Our customer centric approach helps us in maintaining long term relationship with our clients.

Save 60% on your **steel construction design and detailing drawing related services** today!

Our portfolio of services includes:

- Steel structural design
- Structural steel detailing
- Structure load analysis
- Steel decking design
- Steel bridge girder design
- Steel stack design
- Steel stair and handrail design
- Tekla 3D modeling
- Shop drawings
- 2D layout drawings
- Fabrication detailing drawings

Our team of CAD professionals ensures that you get the best design services and avail you free unlimited revisions in order to customize the design to your satisfaction. We use advance resources and latest CAD techniques such as Tekla (X-steel), StaadPro, AutoCAD and Revit to analyze each component in real time and provide accurate representation of the whole structure.

Some of the industry segments we serve:

- # Residential structures
- # Steel buildings and homes
- # Churches, garages & commercial structures
- # Industrial plants
- # Miscellaneous structures

We stick to your company's CAD standards and if you want, we can convert your files using industry specific CAD standards (AISC, BS, AWS, ASTM and NDS).

Our team has the adequate expertise to provide structural design and analysis services for Reinforced Cement Concrete (RCC), Post-Tensioned, Precast, Pre-stressed, Lumber, Masonry and Composite construction.
