**March 29, 2010** - [PRLog](#) -- <http://yalgar.com>

With the time mobile has become so essential part of our life so it can be considered as a basic need for every human being. Now it is “No life without mobile”.

It's not only a cell phone now it has become a communicator. It is loaded with contacts, songs, camera, scheduler, clock, watch and now with social media applications.

In india we have a variety of choices available for mobile phones, choices can be looked as,

**Connectivity:** the basic criterion for best mobile phone. User should be connected to people through the mobile phone from all parts of India. Most mobiles are operational at GSM 850/900/1800/1900MHz. The CDMA handsets are also available for connectivity. Both should connect the user at all places for comfort.

**Dual SIM:** Now with dual active sim car phones user is able to get rid of two phones if he/she has 2 phone numbers, it can be due to user wants to keep professional life separate then his private life.

**MP3 player and Radio connectivity:** If user travels a lot then he prefers phone which do have mp3 players in-built so he can enjoy the songs and pass the time.

**Camera:** There was a time when we carry a separate camera when we go for some site seeing but now days, we can see everyone only carrying a mobile phone because they are having superior camera quality available with them.

**Talk time:** You can't deny the factor that talk time is essential for success of any mobile phone. More the time it can sustain without recharging.

**Cell phone prices:** In India high-price mobile can suit to one person but not to his /her pocket, so concept “cheaper gets sold” still works here. It's the most crucial factor for sale. So best phone can be considered which is cheapest.

We are presenting all the facilities of MP3, Camera, Dual SIM, Talk time with only Branded phones but at 80-90% discount. Yes it's true. You need at cheaper cost and we provide original branded things only at the price you want. For more information check out
