Snap-On Smile, An Affordable Solution To Tooth Imperfections

In 2004, Dr. March Liechtung, a cosmetic dentist in New York, introduced his invention called Snap-on Smile. The appliance is made of crystallized acetic resin known to be strong and durable given the right care.

Oct. 28, 2010 - PRLog -- In 2004, Dr. March Liechtung, a cosmetic dentist in New York, introduced his invention called Snap-on Smile. The appliance is made of crystallized acetic resin known to be strong and durable given the right care. Snap-on Smile provides a temporary remedy for a Hollywood Smile Makeover that boosts a person's self confidence in offering a great smile. For those who are financially constrained to have a permanent veneers, the removable veneers is a great alternative. The principle behind the successful practice of Dr. Liechtung is not to give in to the limitations of providing treatment to the patient to enable him/her to continue living a normal life. Snap-on Smile offers patients with tooth imperfections a solution that suits his/her lifestyle.

If you don't particularly like the shape of your teeth, you have two options. One, is to go a cosmetic dentist and have your teeth reshaped the traditional way or get a Snap-on Smile. The patient's objective in having a tooth reconstruction is considered foremost. Cosmetic dentistry can take care of tooth imperfections and total oral care management as well with a touch of artistry. The artistic dimension of cosmetic dentistry can only be achieved under the critical eye for details of a dentist whose aim is to create permanent beautiful teeth for a perfect smile. But if the patient is restrained, then an alternative is recommended.

Hollywood Smile Makeover With Snap-On Smile
Traditionally, veneer implants require several visits to the dentist. Depending on the oral problem, it may take a couple of weeks but can run into months. Veneers are long lasting and more natural. But there are also problems associated with veneers just as there are problems with removable veneers. Issues can be sorted out to achieve the best possible solution to the problem. And the best way to solve it is to engage professional intervention. Cosmetic dentists are in the best position to help with dental problems.

The Snap-on Smile device is a removable veneer that can give you a Hollywood Smile Makeover. The idea of a Hollywood Smile Makeover springs from the fact that celebrities, most often, epitomize the perfect smile. One cannot appear on the silver screen with ugly bad teeth. Everyone deserves to flash a celebrity smile, anytime, anywhere but not everyone has a perfect set of teeth to do that. Snap-on Smile is the kind of makeover that aims to provide people with alternative solutions to ugly teeth and enable them to flash that celebrity smile.

When Snap-on Smile was launched, it caught the fancy of many Americans, and soon Europeans. Cosmetic dentistry has been revolutionized by the removable veneers. While it is unethical for a cosmetic dentist to recommend the use of this appliance without proper consultation and diagnosis, he/she, however must be conscientious in recommending it. The values and ethics in cosmetic dentistry practice should not be compromised with the Snap-on Smile device. Treating the root of dental problems is always the primary concern.

Dr. Liechtung has maintained a good practice in cosmetic dentistry that enabled him to be proactive in finding solutions to dental problems, while considering the economic and social objectives of patients.
