

## **Zaca Organic Recovery Patch Offers a Safe, Simple and Natural Remedy for Partying**

*Zaca Inc. is excited to announce its all-natural Recovery Topical Patch. The product, which contains nearly a dozen ingredients, provides a simple, safe way for people to have feel-great mornings after holiday parties and other social events.*

**Dec. 11, 2010** - [PRLog](#) -- Denver, CO, December 12, 2010 -- Zaca Inc. is pleased to officially introduce its Recovery Topical Patch as a simple, natural way to help you wake up refreshed. The product is now being distributed worldwide online and throughout Colorado, making it more easily accessible for the upcoming holiday season.

Zaca's recovery patch is completely free of chemicals and other potentially-harmful substances. It contains 11 different organic ingredients that harmonize with your body to help you feel better long after you're done with the party. The ingredients are prickly pear, milk thistle, thiamine (B1), lipoic acid, B5, B3, taurine, lycopene, N-Acetyl-L-Cysteine (NAC), magnesium and vitamin C. Zaca's ingredients address all the possibilities-making it much more effective than other similar products.

The Recovery Patch is one of the first organic products of its kind, according to its co-founder Mark Aleks. The innovative patch is a small, gauze-textured "sticker" that is very lightweight and easy to apply. Users can place the patch on their shoulder, arm or a concealed place on their body, making it convenient to wear. "With most products, you have to pop pills, take tablets or use a drink that is usually loaded with calories and/or sugar," Aleks explained. "Our product stands out because it's the simplest solution out there. You just put it on before you go out and keep it on for 24 hours."

Aleks points out that the Recovery Patch is not being touted as a treatment or cure for any disease. However, the ingredients are an effective solution for feel-great mornings, clear-headedness and bright eyes. "The ingredients in Zaca's organic patch contain some essential vitamins, minerals and herbs, which help protect your body and allow you to feel better faster," he adds.

The Recovery Patch is a high-quality, all-natural product that gives individuals a more stylish alternative to regimented supplements or potions. The product caters to a vast market of people and addresses a significant problem for employers. An estimated 100 million people party at least once a week. And an estimated \$148 billion a year in revenue is lost from reduced productivity and absenteeism due to people not feeling good from partying, according to the Annals of Internal Medicine.

With the holidays fast approaching, the expanded distribution of the Recovery Patch is very timely and valuable news for would-be partygoers. Prices for the product start at \$19.95. ### About Zaca Inc.:

Zaca Inc. was co-founded by Mark and James Aleks in 2008. The brothers-who enjoy socializing responsibly-wanted a natural, mainstream way to help people that are active and like to party, yet have professional lives to maintain. So they developed a chic organic recovery patch that would help people "be nice to their body." Their Recovery Patch gives users a classier option to traditional solutions. In the future, the company has plans to develop more products for social and professional people who want to maintain a healthy lifestyle without the slumps. Currently, Zaca is working on opening distribution channels across the United States as well as in other countries. A privately-held company, Zaca is based in Denver, Colo.
