

Top 5 winning strategies for new pick 7 lottery

Lottery players around the globe will now have a chance to win big with the new multi-nation Lucky 7 lottery. The jackpots for an international, multi-site lottery are sure to make Power-Ball, Mega-Millions and EURO Million a thing of the past.

March 18, 2011 - [PRLog](#) -- To be prepared here are some tips from lottery consultant Christopher Williams:

- Many people make the mistake of betting seven consecutive numbers, these combinations never come out in Lotto Max draws. Stay away from common number combination mistakes.
- Betting patterned combinations, multiples of 5, 7 etc. Stay away from combinations.
- Combinations that have won before, since statistically, these won't appear again. Stay away from previous winners
- Look for trend numbers. A hot trend would be numbers that have not been drawn in some time. A Cold trend would be numbers that have not appeared in a winning ticket, this would make them likely to be drawn. Be sure to have a good mixture of both.
- If you choose based on birth dates or anniversary you are missing crucial numbers that are hampering your chances of winning. Stay away from your special dates.
