

Mobile Horse Wagering in California

In May of 2012 California will be the first of many states to allow legal Mobile wagering on Horse racing.

March 24, 2011 - [PRLog](#) -- Today Automated Sports introduced their plans for their Mobile Horse Platform with the intention of offering it to the all California tracks.

With the same wagering capabilities you would have at the track or OTB the Automated Sports Mobile Horse Platform will make you feel as if you are actually wagering at the races. This easy to use interface carrying all the US, UK, European and South African tracks insures that this will be one of the most widely used Mobile Horse Applications on all internet ready phones.

“We have not forgotten about the Horse players like many others on the web have and with this new Horse application we are allowing the freedom of wagering on any track at anytime!” states James Ford

For any additional information pertaining to any Automated Sports Platform module and their Lottery modules please contact a representative using:

support@automatedsports.com or www.automatedsports.com

Choose Automated Sports and let it work for you!
