

Motherboard Books Commemorates Eighth Anniversary with Award

Prominent computer literacy publisher Motherboard Books is ringing in its eighth anniversary in style by winning Practical Homeschooling Magazine's Readers Choice Award for Computer Science in 2011.

Nov. 1, 2011 - [PRLog](#) -- Prominent computer literacy publisher Motherboard Books is ringing in its eighth anniversary in style by winning Practical Homeschooling Magazine's Readers Choice Award for Computer Science in 2011. This isn't the first time Motherboard Books has received the honor. The popular homeschool-friendly company was awarded the same distinction in 2010.

As part of its commemoration, Motherboard Books recently offered its e-book Let's Make a Webpage at a 30 percent discounted rate through the first week of October. The book was written by company owner Phyllis Wheeler and is designed to teach tweens and grade-school children how to create their own website using an HTML editor. Everything from adding text and animation to uploading the page itself to the internet is detailed in just sixty pages.

Since 2003 Motherboard Books has served as a resource for parents worried that their homeschooled children are falling behind in their computer skills. The award-winning company is helmed by Phyllis Wheeler, a veteran homeschooling mom, writer and mechanical engineer. With the help of industry professionals she devised and published her first computer science book for kids, Computer Science Pure and Simple, and has since written a various books and e-books designed to make students more computer literate.
