The Retirement-Toolbox LLC, a Brigantine, NJ Financial Services Firm, released a new video on YouTube and Facebook on Tax-Free Retirement Plans.

“There are many benefits to a Tax-Free Retirement Plan. Your money grows tax-free and you benefit from the magic and power of tax-free compounding. There is no market risk. You don’t lose money when the market goes down. So, you don’t have to recover from deep stock market losses. With no market losses and tax-free growth your money grows faster. You will also enjoy easy access to your money when you need it. There are no income taxes and no early withdrawal penalties.” Bruce E Cox CPA pointed out.

Everyone will need to replace a paycheck with a retirement check when they retire and these checks might have to last 25 to 30 years or longer.

The Video: Tax-Free Retirement Plans points out a major obstacle facing retirees: Retirement Plan Tax-Traps. These tax-traps will deliver a crushing blow to IRAs, 401(k)s and 403(b) retirement plans when retirees need them the most, during withdrawals. Federal and State income taxes could grab 40% or more of each retirement plan paycheck. In effect, Government is a 40% partner in each withdrawal.

The Video provides a solution and viewers will conclude it is a no brainer to switch to a Tax-Free Retirement Plan. You can keep the Government as a 40% Partner, or switch to a Tax-Free Retirement Plan and keep 100% of your retirement money.

“Switching future contributions to a Tax-Free Retirement Plan is truly a no brainer. Many clients have said they wish they knew about this twenty years ago, because the sooner you start the more powerful the impact of tax-free compounding,” concluded Mr. Cox
