

## **Bus Conversions & Motor Homes - Fuel Saving solutions, SaveonFuelSystems.com**

*Bus conversion owners are hands on group of Motor Home enthusiasts always looking for ways to improve and save fuel*

**BOCA RATON, Fla. - Aug. 21, 2014 - [PRLog](#)** -- It's not an easy task to reconfigure a full sized bus that once carried passengers from point A to point B. Many of these conversions date back as far as the sixties. The majority of Bus conversion owners are smart, successful retired professionals and business owners that appreciate quality. Conversions are a very costly measure to become the King of the open road.

In recent years nothing has affected these Bus owners and the Motor Home community more than the cost of fuel. Studies show that these luxury Bus Conversions might get 6 MPG and omit excessive black smoke or Carbon Pollution. There are a couple of good cost effective solutions that are guaranteed to work.

Bus Conversion Groups and Motor Home owners have been searching for and have discovered the ECOFuelMaximizer, a low cost (\$270-\$450) inline fuel vaporizer guaranteed to work. Installed and working for over 14 years, on thousands of School Buses, Motor Homes, Big Rigs, and Heavy Equipment, Boats and even on Police and Fire vehicles.

The ECO fuel enhancer is a No Chemical, No Maintenance patented & proven alternative to reduce Fuel consumption and Carbon Pollution. On newer diesels it reduces Regen maintenance. The ECOFuelMaximizer has a 90 day return Guarantee policy. You don't like it, return it.

Another solution that has been around for many years is Hydrogen. Many companies have come and gone, those that remain are the leaders in the Hydrogen Fuel revolution. The HydroDynamo Booster is one that can increase MPG +/- 50% and reduce your Carbon Footprint 90%+

HydroDynamicsHHO.com has joined forces with ECOFuelMaximizer.com to offer the public, businesses and Governmental agencies alternatives to controlling Carbon Pollution and reducing fuel consumption.

It is time to Act! If you or anyone you know is interested in saving fuel and reducing pollution call or email for the latest information and updates.

GO GREEN – Burn Clean!
