Terry Sacka, AAMS is the founder of Cornerstone Asset Metals, a dealer in natural resources (precious metals to be specific), and offers gold, silver and other precious metals backed IRAs, backed by real physical, tangible hard assets, not paper investments.

At Cornerstone they believe with fluctuating paper-dominated assets funding the majority of individual retirement accounts and the potential shortfall in Social Security, a well-diversified retirement plan should include precious metals; one of the few assets that have demonstrated the ability to retain value when other investments may fall short.

Precious Metals IRAs

Gold and silver is the best performing asset class in the last ten years. The nice part about a precious metals IRA - there actually is a physical metal purchased and stored on your behalf. Gold is capable of going back to its high, yielding a 60% return and silver a 200% return. They are the real wealth transfer in the physical market.
