

Nila Chosen by Pepperdine as One of the Most Fundable Companies

ALTADENA, Calif. - Oct. 15, 2018 - [PRLog](#) -- Nila, Inc. is thrilled to announce that it was named to the Pepperdine Graziadio Business School's first annual [Most Fundable Companies List](#). Nila, Inc. competed against thousands of early-stage U.S. companies with less than \$10 million in annual revenue to be named one of the fifteen most fundable companies.

"We expect to change the world of high-intensity lighting through sustainable design. That goal becomes more immediately attainable with outside funding. The recognition we gain through the Most Fundable Company initiative helps improve our funding prospects and brings us one step closer to achieving market leadership," said Nila President, Jim Sanfilippo. "We're excited that the Pepperdine Graziadio Business School is giving us a platform to showcase our business to help to set us up for success with investors."

Nila's mission is the creation of lighting systems that are sustainable by design. They meet their customer's lighting needs today by producing the highest quality lighting systems without compromising the needs of future generations. Nila has created sustainable lighting systems for a diverse set of clients including the US House of Representatives, AEG's StubHub Center (home of the LA Chargers), Ski Dubai, CNN, Fox News, CBS News, NBC, Rolls Royce, GE Aviation, and many, many more.

As a winner on Most Fundable Companies List, Nila will be profiled on Entrepreneur.com and will be featured in the November print issue of the magazine.

The Most Fundable Companies initiative involved a multi-phase assessment that evaluated several company variables including financial projections, market opportunity, intellectual property and the strength of the management team, all of which were used to produce a fundability score. The top 15 companies were selected in partnership with The Venture Alliance (TVA) based on their readiness for private investment. Honorees on the inaugural list are located across the country and come from a variety of industries including telecommunications, blockchain, and construction.
