

Healthcare Simulation Middle East names winners during Simulation Week 2022

Youness Zidoun from United Arab Emirates and Soheir Elbanna from Egypt.

DUBAI MEDIA CITY, UAE - Nov. 7, 2022 - [PRLog](#) -- Youness Zidoun and Soheir Elbanna are winners of annual subscription worth \$250 to the LEARN Platform on HealthySimulation.com, exclusively courtesy Healthcare Simulation Middle East.

They receive a digital winner's badge, winner's certificate and 365-day access to LEARN platform.

Youness Zidoun, Director of Technical Simulation Laboratory at Dubai Medical College for Girls, says, "What better way to end #SimWeek22 than a win!! During Healthcare Simulation Week, we celebrate ourselves as a community of healthcare simulation professionals driving local and global impact."

Soheir Elbanna, Faculty of Nursing at Badr University, says, "The professional visibility opportunities and community vibe created by Healthcare Simulation Middle East breaks silos and unifies the region. LEARN is a resource-rich learning platform with access to quality content from subject matter experts. "

Simulationists are learning faster & doing more than ever before. With learning resources distributed across the internet, access on-demand is a challenge for busy professionals. LEARN is a no-sweat, one-stop destination to keep up with it all.

Lance Baily, Founder & CEO of HealthySimulation.com, says, "Congratulations to Youness Zidoun and Soheir Elbanna for winning an annual subscription to HealthySimulation.com LEARN platform. We laud their contribution to sim community initiatives in the Middle East, and for the work they do to improve patient care."

The domain of healthcare simulation combines education, technology, operations, research and leadership skills. It is not unusual for simulationists to juggle multiple responsibilities from creating curriculum to running the department or center. Healthcare simulation professionals work behind the scenes and make a difference on the frontlines of healthcare.

Ansari Shabnam Ateeq, President of Healthcare Simulation Middle East, says, "Healthcare simulation has experienced a paradigm shift due to the pandemic, increased acceptance as an alternative to traditional learning, and rapid development of mixed reality solutions. LEARN platform is a learning repository for busy sim professionals to keep up with knowledge, tools and technologies in healthcare simulation. We want to make the resource available to healthcare simulationists in the Middle East."

She adds, "Youness Zidoun and Soheir Elbanna lead by example on what it means to be a sim champion. They are engaged with the value of healthcare simulation, they are active participants in local and global sim communities, they support and celebrate the good work of sim champs and they value learning. There is no doubt they are ambassadors of their institution, nation and sim community."
