

Plan Heal Smart Health Assessment Platform Now Available in the Microsoft Azure Marketplace

Microsoft Azure customers worldwide now gain access to Plan Heal Smart Health Assessment platform to take advantage of the scalability, reliability, and agility of Azure to drive application development and shape business strategies.

CHICAGO - Dec. 6, 2023 - [PRLog](#) -- Plan Heal today announced the availability of the Smart Health Assessment platform in the Microsoft Azure Marketplace, an online store providing applications and services for use on Microsoft Azure. Plan Heal customers can now take advantage of the scalability, high availability, and security of Azure, with streamlined deployment and management.

Plan Heal is a digital health company that's on a mission to use the power of AI to help populations live safer, healthier, and more productive lives. Plan Heal Smart Health Assessment is an on-demand health monitoring platform that enables secure real-time patient health education and status reporting through the power of Microsoft Azure, Azure AI, and Azure Health Bot. The platform helps care teams access real-time quality patient health data that's actionable using Microsoft Azure Machine Learning, Azure Analytics Services, Azure SQL, Azure Data Services, and Power BI— all helping teams to make the right patient care decisions at the right time.

Integrating the Plan Heal Smart Health Assessment platform API capabilities into existing patient care workflows delivers value throughout the patient's healthcare journey pre- and post-diagnosis. Healthcare organizations that partner with Plan Heal can expect to increase patient access to meaningful use tools; receive data services that support existing EHR systems; access real-time predictive risk modeling for earlier detection of disease; and gain ongoing post-treatment monitoring capabilities to decrease post-treatment readmissions.

"Right now, in the US alone, more than 167M people have a disease but do not know it," said Tammy McMiller, Founder and CEO, Plan Heal. "We built the Plan Heal platform to empower care providers with digital capabilities to better manage consumer care at scale. Integrating the Smart Health Assessment's APIs into existing workflows delivers real-time data capture and analysis to increase care teams' access to more personalized and holistic patient health insights that are unique to each individual consumer's health to enable clear and actionable decision support. The Plan Heal Smart Health Assessment platform supports health equity and population health programs for general consumer populations and vulnerable populations using easy-to-access consumer applications that can be securely accessed using any consumer mobile device, laptop, or desktop."

Jake Zborowski, General Manager, Microsoft Azure Platform at Microsoft Corp. said, "We're pleased to welcome the Plan Heal Smart Health Assessment platform to the Microsoft Azure Marketplace, which gives our partners great exposure to cloud customers around the globe. Azure Marketplace offers world-class quality experiences from global trusted partners with solutions tested to work seamlessly with Azure."

The Azure Marketplace is an online market for buying and selling cloud solutions certified to run on Azure.

The Azure Marketplace helps connect companies seeking innovative, cloud-based solutions with partners who have developed solutions that are ready to use.
