

The Biokovo Code Set to Shock Worldwide Audiences

WASHINGTON - March 21, 2024 - [PRLog](#) -- Just in time for **International Women's Month**, Author Eugene Tossany published her fourth book, titled *The Biokovo Code*. Written as a three-part series, *The Biokovo Code* is now available on Amazon.com in Kindle, paperback, and hardcover formats. This exhilarating speculative fiction is geared toward millennials, generation X, and conspiracy theorists who find and champion worthy global activism causes.

The Biokovo Code is the culmination of twelve years' worth of research, coordination with sheriff's offices, non-profit organizations, child rescue task forces, and extensive exploration into ancient texts, bolstering its potential appeal as an international thriller. After delving into the reality of human trafficking involving children, Eugene also wanted to produce a work that would bring attention to and encourage readers to understand a dark subject the media often refuses to cover. According to human trafficking expert Terry Coonan:

Human trafficking is a multi-billion-dollar growth industry because, unlike drugs, which are gone as soon as they are used, humans can be recycled. Because they can continue to be exploited, they're a better investment for traffickers.

But why does it continue? What cabal-like power(s) continue to allow it to happen? These are queries *The Biokovo Code* poses to readers in the context of speculative fiction. This is Eugene Tossany's second book series. Eugene's first book series, *The Down Syndrome Superhero* (1-3) was about encoded DNA hiding within the 21st chromosome; the only science fiction saga featuring a Down Syndrome female protagonist.
