

Apps with Benefits: Encyclo-AI Launches New Offer Giving Users Free Access to Create and Download Smartbooks and Audiobooks

PARIS - Sept. 2, 2026 - [PRLog](#) -- [Encyclo-AI](#) today announced a new promotion designed to make it easier for anyone to explore, create and learn with Smartbooks and Audiobooks. New users can open a free Encyclo-AI account, create their own Smartbooks and download Smartbooks and Audiobooks from the library with more than 600 titles at no cost by receiving five free credits to experience the platform.

Smartbooks are customized digital books delivered in PDF, e-reader and audio formats designed to help users quickly understand complex topics. Instead of spending hours searching across websites, articles, documents and other sources, users can create a Smartbook or Audiobook tailored to a specific subject, audience and level of expertise.

With the promotion, users can create and share their own Smartbooks on any topic for free, making it possible to turn a question, research project, professional interest or learning goal into a structured and shareable resource. Users can also immediately explore the library and download existing Smartbooks and Audiobooks for free.

The five free credits give new users an opportunity to experience the full Smartbook and Audiobook creation process without an initial financial commitment.

"We want people to experience how fundamentally different research and learning can be when they can turn information into a Smartbook created specifically for you," said Eric Carmès, aka Encyclo-Eric, the Founder of Encyclo-AI. "By giving users five free credits to create Smartbooks or download existing content from our library, we're making it easy for anyone to discover what they can do with Encyclo-AI."

The promotion is designed for a broad range of users, including students, educators, professionals, researchers, business leaders and lifelong learners. Smartbooks and Audiobooks can be used to explore unfamiliar subjects, prepare for meetings or presentations, conduct research, support professional development, or simply learn more about a topic of interest.

"People shouldn't have to be experts in research to become experts in a subject," added Encyclo-Eric. "In the tradition of other great, curated research products such as *Que sais-je?*, our goal is to make high-quality, human curated, personalized knowledge accessible to everyone."

To take advantage of the promotion, users can create a free account at encyclo-ai.com and begin exploring the Smartbook and Audiobook library, downloading available Smartbooks and Audiobooks and creating their own.

About Encyclo-AI

Encyclo-AI is a knowledge and learning platform that transforms information into customized Smartbooks and Audiobooks that are human curated. The platform enables users to explore topics, conduct research and create structured, personalized digital and audio books tailored to their interests, needs and level of

expertise. Through its Smartbook and Audiobook library and human curated creation tools, Encyclo-AI aims to make discovering and understanding knowledge faster, easier and more accessible.
