# Los Angeles Business Titan Gary Monroe Brings ZoomFins Manufacturing Back To The United States

**NEW YORK - Oct. 13, 2026** - *PRLog* -- Business titan Gary S. Monroe and his teams in Los Angeles and New York are working to bring Zoom Fins LLC's manufacturing back to the United States from Southeast Asia.

Mr. Monroe shared, " Our President, Donald J. Trump, and his executive team developed this incredible opportunity for some of the smaller companies like mine.  These $5 million and up to $10 million loans will not only assist in the relocation back home, but allow us to be part of the President's massive development push to *Make America Great Again."*

The motorized fin, developed for the U.S. market, changed the way people can use a paddle board, and that community has expressed huge excitement for THE FIN. **The company is currently reviewing bids from US suppliers for the internal and external parts required to manufacture Zoom Fins here in the US.**

"This is a tremendous move" said Mr. Monroe. He continued. "With the explosive growth of paddle boarding we have experienced over the past few years, it has become imperative for Zoom Fins to be present in the market today.

Motorized paddle boarding lets enthusiasts glide effortlessly across the water. Similar to e-bikes, you can still paddle manually, but the motor makes paddle-boarding a whole new experience. The motorized fin makes the sport more accessible, fun, and adventurous. Zoom Fins are changing the way people experience paddle-boarding.
